

- Science is taught in line with the National Curriculum and using the scheme 'switched on science' supported by other high quality resources, in blocked units every half term.
- Where possible lessons involve a practical element and are recorded using photographs as well as pupil work.
- As pupils progress up the school they are encouraged to work as independently as possible, selecting their own resources, planning and carrying out investigations.
- A range of resources are used to teach lessons including PowerPoints, online videos and practical demonstrations.
- Pupils work in a range of different ways both individually and in groups, both inside and outside of the classroom.
- Workshops, trips and science weeks are also used to enhance the curriculum and further engage the pupils.
- Pupils can choose to attend science curriculum clubs on a Friday afternoon to further develop their interests.
- Parents are invited into school to share in the pupils' work and engage in practical activities.

Science Overview 4 Year Cycle (A whole school science week is also planned each year focusing on investigative skills)

	Key Stage 1	Lower Key stage 2	Upper Key stage 2
Cycle 1 Year 2019-20	<p>Everyday Materials (polar adventures or treasure island) Animals including humans (on safari) Seasonal Changes (seasons) Plants (Celebrations) Animals including humans (Who am I?)</p> <p>Additional unit: Holiday</p>	<p>Forces and magnets (Opposite attracts) Animals including humans (Food and our bodies) Light (Mirror Mirror) Rocks and soils (Earth Rocks) How plants grow (How does your garden grow)</p> <p>Additional unit: We are astronauts</p>	<p>Forces (Let's get moving) Properties and change of materials (material world) Earth and Space (out of this world) Living things and their habitats (Circle of Life) Animals including humans (growing up and growing old)</p> <p>Additional unit: Super scientists</p>
Cycle 2 Year 2020-21	<p>Animals including humans (little masterchef) Animals including humans (Healthy Me) materials (Materials Monster) Plants (young gardeners) Living things and their habitats (mini worlds)</p> <p>Additional unit: move it</p>	<p>Animals including humans (Teeth and eating) Electricity (power it up) Sound (What's that sound) Living things and their habitats (Living things) States of matter (looking at states)</p> <p>Additional unit: Brilliant bubbles</p>	<p>Animals including humans (staying alive) Light (let it shine) Evolution and inheritance (We're evolving) Living things and their habitats (classifying plants) Electricity (electrifying)</p> <p>Additional unit: We are dinosaur hunters</p>
Cycle 3 Year 2021-22	<p>Everyday Materials (polar adventures or treasure island) Animals including humans (Animals and Pets) Seasonal Changes (Seasons) Plants (Planting masterclass) Animals including humans (My Senses)</p> <p>Additional unit: Holiday</p>	<p>Forces and magnets (Opposite attracts) Animals including humans (Food and our bodies) Light (Light) Rocks and soils (Rock detectives) How plants grow (Plant detectives)</p> <p>Additional unit: We are astronauts</p>	<p>Forces (Let's get moving) Properties and change of materials (material world) Earth and Space (out of this world) Living things and their habitats (Circle of Life) Animals including humans (growing up and growing old)</p> <p>Additional unit: Super scientists</p>

Cycle 4 Year 2022-23	Animals including humans (little masterchef) Animals including humans (Healthy Me) materials (Materials Monster) Plants (young gardeners) Living things and their habitats (mini worlds) Additional unit: move it	Animals including humans (Teeth and eating) Electricity (power it up) Sound (What's that sound) Living things and their habitats (Living things) States of matter (looking at states) Additional unit: Brilliant bubbles	Animals including humans (staying alive) Light (let it shine) Evolution and inheritance (We're evolving) Living things and their habitats (classifying plants) Electricity (electrifying) Additional unit: We are dinosaur hunters
----------------------------	--	---	---

Science Progression of Skills

		Year 1/2	Year 3/4	Year 5/6
W o r k i n g	Asking Questions			
	<ul style="list-style-type: none"> ● ask simple questions and recognise that they can be answered in different ways 	<ul style="list-style-type: none"> ● ask relevant questions and use different types of scientific enquiries to answer them ● set up simple practical enquiries, comparative and fair tests 	<ul style="list-style-type: none"> ● plan different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary 	
S c i e n t i f i c a l l y	Measuring and recording			
	<ul style="list-style-type: none"> ● observe closely, using simple equipment ● perform simple tests ● gather and record data to help in answering questions 	<ul style="list-style-type: none"> ● make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers ● record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables ● gather, record, classify and present data in a variety of ways to help in answering questions 	<ul style="list-style-type: none"> ● take measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate ● record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs 	
Concluding				

	<ul style="list-style-type: none"> ● identify and classify ● use their observations and ideas to suggest answers to questions 	<ul style="list-style-type: none"> ● identify differences, similarities or changes related to simple scientific ideas and processes ● report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions ● use straightforward scientific evidence to answer questions or to support their findings 	<ul style="list-style-type: none"> ● identify scientific evidence that has been used to support or refute ideas or arguments ● report and present findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations
Evaluating			
		<ul style="list-style-type: none"> ● use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions 	<ul style="list-style-type: none"> ● use test results to make predictions to set up further comparative and fair tests

	Year 1	Year 2
Plants		
	<ul style="list-style-type: none"> ● identify and name a variety of common wild and garden plants, including deciduous and evergreen trees ● identify and describe the basic structure of a variety of common flowering plants, including trees 	<ul style="list-style-type: none"> ● observe and describe how seeds and bulbs grow into mature plants ● find out and describe how plants need water, light and a suitable temperature to grow and stay healthy
Animals including Humans		

- identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals
- identify and name a variety of common animals that are carnivores, herbivores and omnivores
- describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets)
- identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense

- notice that animals, including humans, have offspring which grow into adults
- find out about and describe the basic needs of animals, including humans, for survival (water, food and air)
- describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene

Living things and their habitats

- explore and compare the difference between things that are living, dead, and things that have never been alive
- identify that most living things live in habitats to which they are suited and describe how different habitats provide the basic needs of different kinds of animals and plants, and how they depend on each other
- identify and name a variety of plants and animals in their habitats, including micro-habitats
- describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food

Seasonal change

	<ul style="list-style-type: none"> ● observe changes across the four seasons ● observe and describe weather associated with the seasons and how day length varies 	
--	---	--

Materials		
------------------	--	--

	<p>Everyday Materials</p> <ul style="list-style-type: none"> ● distinguish between an object and the material from which it is made ● identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock ● describe the simple physical properties of a variety of everyday materials ● compare and group together a variety of everyday materials on the basis of their simple physical properties 	<p>Uses of Everyday Materials</p> <ul style="list-style-type: none"> ● identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses ● find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching
--	--	---

Year 3	Year 4
---------------	---------------

Plants	
---------------	--

	<ul style="list-style-type: none"> ● identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers ● explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant investigate the way in which water is transported within plants ● explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal 	
--	--	--

Animals including humans	
---------------------------------	--

- identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat
- identify that humans and some other animals have skeletons and muscles for support, protection and movement

- describe the simple functions of the basic parts of the digestive system in humans
- identify the different types of teeth in humans and their simple functions
- construct and interpret a variety of food chains, identifying producers, predators and prey

Living things and their habitats

- recognise that living things can be grouped in a variety of ways
- explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment
- recognise that environments can change and that this can sometimes pose dangers to living things

Light

- recognise that they need light in order to see things and that the dark is the absence of light
- notice that light is reflected from surfaces
- recognise that light from the sun can be dangerous and that there are ways to protect their eyes
- recognise that shadows are formed when the light from a light source is blocked by a solid object
- find patterns in the way that the size of shadows changes

Sound

- identify how sounds are made, associating some of them with something vibrating
- recognise that vibrations from sounds travel through a medium to the ear
- find patterns between the pitch of a sound and features of the object that produced it
- find patterns between the volume of a sound and the strength of the vibrations that produced it
- recognise that sounds get fainter as the distance from the sound source increases

Forces and magnets

compare how things move on different surfaces

- notice that some forces need contact between two objects, but magnetic forces can act at a distance
- observe how magnets attract or repel each other and attract some materials and not others
- compare and group together a variety of everyday materials on the basis on whether they are attracted to a magnet, and identify some magnetic materials
- describe magnets as having two poles
- predict whether two magnets will attract or repel each other, depending on which poles are facing

Electricity

- identify common appliances that run on electricity
- construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers
- identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery
- recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit

- recognise some common conductors and insulators, and associate metals with being good conductors

Materials

Rocks

- compare and group together different kinds of rocks on the basis of their appearance and simple physical properties
- describe in simple terms how fossils are formed when things that have lived are trapped within rock
- recognise that soils are made from rocks and organic matter

States of matter

- compare and group materials together, according to whether they are solids, liquids or gases
- observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C)
- identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature

Year 5

Year 6

Animals including Humans

- describe the changes as humans develop to old age

- identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood
- recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function
- describe the ways in which nutrients and water are transported within animals, including humans

Living things and their habitats

- describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird
- describe the life process of reproduction in some plants and animals

- describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including micro-organisms, plants and animals
- give reasons for classifying plants and animals based on specific characteristics

Evolution and inheritance

- recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago
- recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents
- identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution

Earth and space

- describe the movement of the Earth, and other planets, relative to the Sun
- describe the movement of the Moon relative to the Earth
- describe the Sun, Earth and Moon as approximately spherical bodies
- use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky

Light

- recognise that light appears to travel in straight lines
- use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye
- explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes
- use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them

Forces

- explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object
- identify the effects of air resistance, water resistance and friction, that act between moving surfaces
- recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect

Electricity

- associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit
- compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches
- use recognised symbols when representing a simple circuit in a diagram

Properties and changes of materials

- | | | |
|--|---|--|
| | <ul style="list-style-type: none">● compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets● know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution● use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating● give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic● demonstrate that dissolving, mixing and changes of state are reversible changes● explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda | |
|--|---|--|
